8. CertFloor Flooring

8.1 Engineered Flooring - T&G

8.2 Solid Hardwood Flooring - T&G

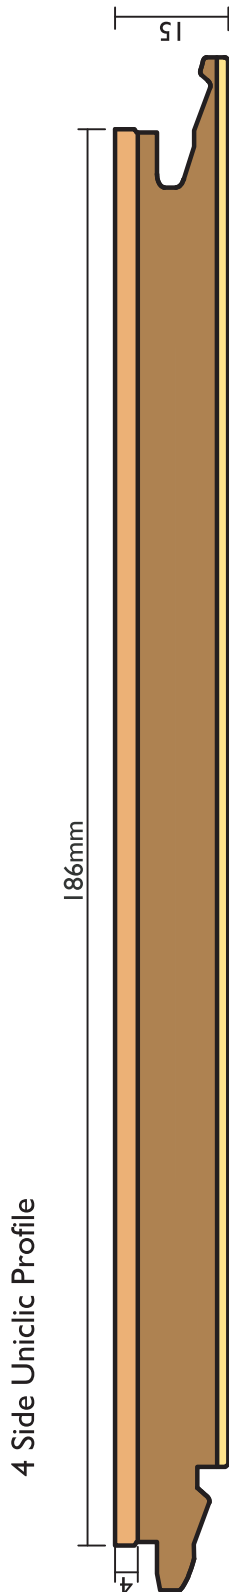

Engineered T&G Flooring

European Oak Flooring

Engineered Flooring

Spotted Gum/ Blackbutt - Engineered Flooring

- No mess and fumes from sanding and finishing.
- Boral® Engineered Flooring can be walked on within hours of installation.
- Boral® Engineered Flooring can be glued or 'floated' over a level sub-floor such as a concrete slab, particle board or plywood sheeting or over old timber floors or tiles. For further information, please visit www.ititimspec.nz/Downloads/6733/
- A variety of quality underlays can be installed with Boral® Engineered Flooring to provide a range of flooring solutions such as floor leveling, cushioning and acoustic properties.
- Boral® Engineered Flooring 134mm is pre-finished with seven layers of matte finish 35% gloss UV cured acrylic coating, while the 186mm is coated with a 10% UV cured acrylic matte and brushed for added texture.
- The 4mm nominal hardwood top layer allows re-sanding and re-coating for a long service life.
- The board has a precision-milled square edge and a 4 side Uniclic profile for a tight board-to-board fit and a smooth consistent finish.
- The product range is available in three beautiful Australian hardwood species.
- The clear coating highlights the natural colour and timber features.
