Accoya Color Grey is a natural wood product that is subject to variations in shade and uniformity of colour between boards. Please note that there can be small less-coloured areas within grade.

While every piece of Accoya Color Grey is colored surface to core, ensuring high durability and low maintenance, please be aware the product may look lighter or darker depending on the batch of product, the natural wood characteristics and the environment the product is used in. All wood decking will require cleaning at least once a year. Fine cracks can appear on Accoya decking after installation and when it starts to weather. Cracks are a natural phenomenon on wood and have no effect on its durability.

\*Wood plastic composite

\*\*Thermally modified

Accoya® Wood has been produced commercially since 2007, initially in small volumes, then growing as manufacturers and architects gained an appreciation of its characteristics. Accoya Color shares all these attributes and more.

For installation guidelines please see [www.accoya.com](http://www.accoya.com).
