

SUSTAINABILITY at WeatherTex

Timber is the ultimate renewable resource and all WeatherTex products are made from 97% hardwood and 3% paraffin wax. WeatherTex primed products are finished with a water-based lead-free acrylic primer. All WeatherTex boards are manufactured using waste timber sourced from Australian, PEFC-certified harvesters. No old growth hardwood is ever used, so there's minimal environmental impact and avoids depletion of natural resources. WeatherTex timber product is the only product of its kind in the world containing absolutely no artificial glues or binders.

WeatherTex is a family owned Australian manufacturing cladding company, operating in NSW since 1939. No toxic or polluting chemicals are required when making WeatherTex boards. The manufacturing process of all WeatherTex products minimises waste bi-products through resource recovery systems. This includes creating compost, using the offcut board as fuel, creating briquettes and using it as packaging. WeatherTex's on-site water management system is unique and highly sustainable, it reduces water usage by ensuring processed water is treated and recycled. WeatherTex has a better than ZERO carbon footprint – making it a sustainable choice!

Like most timber products, WeatherTex can be reused/repurposed for various usages – other construction applications, recycled into packaging, used as fuel or turned into compost. Even in landfill, WeatherTex does not rot/breakdown, so the carbon stored in it will remain contained indefinitely.

WHAT ARE THE BENEFITS OF USING WEATHERTEX?

Made in Australia

Family owned and manufactured in the Hunter region, NSW since 1939.

Trusted

WeatherTex voted #1 MOST TRUSTED brand in the building industry by Architecture & Design 2016-18. Won SUPPLIER OF THE YEAR in the Australian Construction Awards.

Sustainable

Better than zero carbon footprint with Third Party Credentials - GreenTag certification and Declare Labeling. Low embodied energy.

Durable

Termite Resistant. Warranty tried and tested not to rot, split or crack for up to 25 years. Natural range is the only timber product in the market to provide a 10 year warranty. 1000 kg/m³ product density with a minimum 32MPa rating. Watertight - no silicone controlled joints required. Mechanical flashing system.

Value for Money

No special tools required for cutting. Large panels and lower wastage costs on Weathergroove Range. Lightweight product - reduces labour costs.

Quick & Easy Installation

Larger panels for quick installation. 9.5mm thickness and matching accessories across all products making it easier to mix multiple profiles within a project. Easier to paint than other materials on the market due to its smoother surface.

Safe

Low VOC. Meets Australian Building Standards. 100% natural product. No silica, glues, resins or formaldehydes.

Stylish Choices

A wide selection of profiles available in various styles, textures and sizes. Easy to incorporate the natural with primed profiles together to offer multiple design options.

LESS THAN ZERO CARBON FOOTPRINT

WeatherTex's factory creates less carbon footprint during the manufacturing process than the timber product can contain and destroy, making WeatherTex better than zero carbon footprint. WeatherTex products are perfect for the changing global environment as it has minimal impact, improves the reduction of carbon footprint as well as having a long life span.

WEATHERTEX ACCREDITATIONS

PEFC Certified

The Programme for the Endorsement of Forest Certification (PEFC) is an international non-profit, non-governmental organization dedicated to promoting Sustainable Forest Management (SFM) through independent third-party certification.

PEFC works throughout the entire forest supply chain to promote good practice in the forest and to ensure that timber and non-timber forest products are produced with respect for the highest ecological, social and ethical standards. Thanks to its eco-label, customers and consumers are able to identify products from sustainably managed forests.

Global GreenTag

WeatherTex have been through a rigorous evaluation from Global GreenTag Pty Ltd to determine their outstanding "green performance" and we are proud to announce we are the FIRST manufactured product to receive a GreenTag Platinum certification with a GreenRate R Level A for our natural range products. Additionally, we've received Gold certification for our primed flat cladding and wall panel sheets.

Ecospecifier Global GreenTagCert™ is a third party, multi-criteria, consensus based and externally verified Type 1 ecolabelling program. One of the largest product sustainability certification systems in Australia and globally. GreenTag is the only Certification Mark in the sector approved by the Australia Competition and Consumer Commission (ACCC), the US Patents and Trademarks Office and green building rating tools, across the globe.

Product Health Declaration

Studies that make connections between toxic products and human health issues speak for themselves, says David Baggs, CEO and Technical Director of Global GreenTag, at the launch of the ecolabel's new Product Health Declaration™ or PhD tool in Sydney at Total Facilities 2017. Ethically, GreenTag did not want to sit on worrying statistics much longer without doing something about it. "GreenTag's PhD is a radical entry into the market but it is also very necessary because it addresses human health concerns directly - we have the first system globally to assess the health impacts of the final product - and not just the hazards of the ingredients."

BRANZ Appraised

BRANZ Appraisals are robust, in-depth independent evaluations for building products and systems to be deemed fit for purpose and Building Code compliant. A BRANZ Appraisal is a tool that facilitates market acceptance. It gives confidence to building specifiers, Regulatory Bodies, Building Consent Authorities and Building Officials during the building and consent process.

Declare Label

WeatherTex has been recently added to the International Living Future Institute Declare Label database. "We are pleased to be part of the Declare Label program," said Jason O'Hagan, Managing Director for WeatherTex. "Product transparency is extremely important especially in the building industry. At WeatherTex we provide our customers with third party product accreditations such as Global GreenTag certifications, Product Health Declarations (PhD), EPDs and now Declare Label". Declare is a voluntary self-disclosure program aiming to transform the building materials industry towards healthier products through ingredient transparency, according to Living Future Institute Australia.
