

XIAMEN OMAX GLOBAL CO., LTD.

PRODUCER STATEMENT

Xiamen Omax Global Co.,Ltd. confirms that it is manufacturing EziPly plywood products for ITI NZ and these plywood products comply with the requirements set out in AS/NZS 2269.0.2012 Plywood Structural.

Furthermore, the individual veneers of the plywood sheet are treated with a waterborne Micronised Copper Azole Timber preservative prior to the assembly and bonding of the plywood sheet. This treated plywood product meets the H3 requirements as set out in AS/NZS 1604 – Preservative Treated Wood Based Products.

In addition to meeting the requirements of AS/NZ 1604, the treated plywood product is supported by the Koppers Performance Chemicals New Zealand Treated Wood Product Warranty when used in Hazard Classes up to H3.2. The warranty can be found on the Koppers website www.kopperspc.co.nz.

Regards,

Simon Zhang
